

-
- **Amazon** Winnipeg, MB
Student Software Engineer *Sep 2019 - Dec 2019, Jan 2021 - March 2021*
 - Created a set of C++ tools around AWS Thinkbox Krakatoa to reduce the artist's cost up to 20%.
 - Implemented multipart and deep pixel reading and writing for AWS Thinkbox Draft.

Used: *C++, Python, Bash, Anaconda*
 - **Scotiabank** Toronto, ON
Student Software Engineer *May 2019 - Aug 2019*
 - Created a PoC around OpenFaaS to develop the department's direction with respect to Serverless Functions. Presented to management and coworkers the benefits of FaaS and OpenFaaS.
 - Migrated an old C++ service to Java Spring with an Angular Frontend. Setup a Jenkins based CICD pipeline with fully automated testing utilizing Selenium and JUnit.

Used: *Java, Docker, Kubernetes, OpenFaaS*
 - **Nokia** Ottawa, On
Student Software Designer *Jan 2019 - Apr 2019*
 - Assisted in the frontend and backend development of the team's device adapter code generator. In some cases automating 100% of the device adapter creation.
 - Created a Java golden file testbed for the teams code generator allowing team members to test their changes against real world use cases.
 - Created a regression framework utilizing Selenium/Javascript to fully automate the testing of the frontend.

Used: *Java, ReactJS, Javascript, Karaf, Docker, Selenium, gRPC*
 - **Rockport Networks** Ottawa, On
Student Microservice Backend Developer *May 2017 - Aug 2018*
 - Designed and implemented a full log management and troubleshooting solution using the ELKB stack.
 - Created an authentication service used to authorize users against a customer provided Active Directory server.
 - Fixed several major bugs in the open source Elastic Beat product family.
 - Worked on various Go microservices which utilized Kafka, Postgres and Elasticsearch.

Used: *Go, Openshift, Kubernetes, Elasticsearch, Kafka, Postgres, LDAP, REST*
 - **Authentiky** Ottawa, On
Student Software Developer *Sept 2016 - Jan 2017*
 - Researched and compared multiple virtual server providers to determine the best fit for the company.
 - Installed, setup, and deployed a XMPP server accompanied by a simple chat bot to Amazon EC2.
 - Developed a PoC video chat website to test usability and functionality of several client side XMPP libraries.

Used: *Java, Tomcat, Tigase XMPP Server, Amazon EC2, Smack*
 - **Sidense** Ottawa, On
Student Software Developer *May 2016 - August 2016*
 - Designed and built automated process models that allowed the company to obtain an ISO 9001 Certification.
 - Used the MVC pattern to develop a Java application to automate model and product design specifications.

Used: *Java, Junit, Javascript, Alfresco, Postgres, Ubuntu, SVN*

EDUCATION

- **Carleton University** Ottawa, ON
Bachelor of Computer Science; GPA: 12.0/12.0 *Sept. 2015 - Dec. 2020*
 - **Deans List, Goldie Wilkinson, John R.Pugh, Rymerson scholarships:** Awarded for outstanding academic achievement by Carleton School of Computer Science
 - **Codeguru Junior Champion (2017):** Awarded for highest placing junior at Carletons Code Guru Competition.

PROJECTS

- **kwojcicki.github.io:** Fully fledged portfolio and blog using Jekyll, with in-depth articles regarding various technology concepts ranging from correct Elasticsearch usage to Information Gain and Decision Trees
- **Tuti:** Flask Python platform helping tutors and tutees connect.
- **Pay Up:** Java receipt sharing application utilizing Google Cloud OCR
